Example of how we help our clients

Here is just a selection of client examples of what we do:

Growing Pains!

Meet Scott. When we met Scott, his business was growing but suffering under pain of growth. The business systems were outdated. Scott was operating from month to month with no long term plan.

We changed his approach by assisting him to develop his plan and map out his vision, including a financial plan. The plan included addressing his structure, taxes and his personal aspirations. Over two years, we assisted him to refocus the business towards growth and direction. Taxes became less of a burden, and profit and expansion became the focus.

The Pain of Tax

Jane had allowed her tax lodgements to fall behind. With our help and understanding, we managed to assist her in focusing on the job at hand. We are happy to say her lodgements are now up to date and business is going well. We are assisting her by proactively undertaking tax planning rather than being chased by the Tax Office.

As you can see our accounting services range from general accounting to assisting clients in focusing on their business and direction.

My revenue is up, but my profit stinks

We often help clients to make sure that the costs are not weighing too heavily on the bottom line. Our dynamic approach makes sure we find those profit leaks.
